

A Bibliography of Articles from Kayak
The official publication of Coin Irregularities Association of Canada
Compiled by Henry Nienhuis

ANONYMOUS

“A Rare Discovery!”. – Vol. 1, no. 2 (Feb. 1971). p. 31, ill. – *announcement of the discovery of the Large Date 1969 10 cent piece with illustration courtesy of Bradshaw, J.*

BEAUVAIS, PATRICK

“Minor contribution”. – Vol. 2, no. 2 (Feb. 1972). p. 34. – *the effects of prolonged use of coinage dies resulting in cracks and chips which are subsequently visible on the coins themselves as raised lines, plugged letters and bumps is discussed*

COYNE, EDWARD

“US irregularity page”. – Vol. 1, no. 1 (Jan. 1971). p. 4, ill. – *errors resulting from special dual-die, where two planchets are struck at once, minting presses are identified*

“US irregularity page - the bonding bug”. – Vol. 1, no. 2 (Feb. 1971). p. 18, ill. – *errors resulting from the separation of "clad" planchets is discussed. Clad strips, used in the production of these planchets, are produced by the explosive bonding of three separate alloy strips; cont'd in Vol. 1, no. 5, p. 79, ill*

“US irregularity page - partial indent vs. partial brockage”. – Vol. 1, no. 4 (April 1971). p. 59, ill. – *the difference between the two often--confused errors associated with multiple planchet strikes is identified*

“US irregularity page”. – Vol. 1, no. 8 - 9 (Aug. - Sep. 1971). p. 108. – *an identification of types of machinery used and the stages in the minting process; cont'd in Vol. 1, no.10, p. 130.*

“US irregularity page”. – Vol. 1, no.11 (Nov. 1971). p. 148. – *a discussion of clad planchets and different bonding methods in the production process; cont'd in Vol. 1, no.12, p. 166.*

“US irregularity page”. – Vol. 2, no.1 (Jan. 1972). p. 12. – *an annotated index of publications dealing with minting irregularities*

ENGLISH, WILLIAM

“English effect”. – Vol. 1, no. 1 (Jan. 1971). p. 2-3, ill. – *the author discusses how it is possible for legitimate planchet clips to exist with and without the depressed area opposite the clip*

“Reeded edge cavity differs on Canadian coins”. – Vol. 1, no. 3 (March 1971). p. 45, ill. – *three types of reeded edging are identified*

“Beware of good luck token "errors"”. – Vol. 2, no. 3 (March 1972). p. 46. – *the act of creating these souvenir pieces results in coins that may appear to be minting errors*

“Another Promotion!”. – Vol. 2, no. 3 (March 1972). p. 46. – *an analysis and rebuttal of an advertisement in a popular coin magazine that states an unsubstantiated claim of discovery and associated scarcity of a 1965 10 cent die type.*

HAXBY, JAMES H.

“‘Trial strikes re-examined’ re-examined”. – Vol. 2, no. 1 (Jan. 1972). p. 2. – *a follow up discussion to an article discussing Weak and Strong variations of the trial strike process by John Regitko in Vol. 1, no. 11, p 144-145.*

“Die varieties of the Newfoundland Queen Victoria fifty cent pieces”. – Vol. 2, no. 1 (Jan. 1972). p. 13-17, ill. – *an in-depth, illustrated article discussing die varieties in early Newfoundland 50 cent pieces*

MARGOLIS, ARNOLD

“Measuring clipped planchet”. – Vol. 2, no. 2 (Feb. 1972). p. 30-31. – *a condensed version of an 8 page article appearing in ETCM: (Nov. 25, 1971) proposing a “course” new method for measuring clipped planchets. Contains a critique by the Editor*

McKINNON, MAX P.

“Muling and medals”. – Vol. 1, no. 5 (May 1971). p. 76-78, ill. – *muling of mass produced medals is discussed using 3 specific examples of Leroux 1517c and 1517d medal muling*

REGITKO, JOHN

“Varieties of the 1954 series of the Canadian \$1.00 notes”. – Vol. 1, no. 2 (Feb. 1971). p. 20-27, ill. – *an in-depth article identifying the numerous types of varieties which exist in the 1954 Bank of Canada \$1 note series - including Devil's Face, signature combinations, muling. A follow up report of a further variation by Trimble, Ralph in Vol. 1, no. 10, p. 135, ill*

“The Token Column”. – Vol. 1, no. 2 (Feb. 1971). p. 29–31, ill. – *examples of a number of mis-strikes and oddities on Transportation Tokens produced by private Mints*

“Once in a lifetime”. – Vol. 1, no. 2 (Feb. 1971). p. 31, ill. – *example of a unique error resulting from a 5 cent planchet being struck on end is shown. There is a follow up report by Coyne, Edward in Vol. 1, no. 8-9, p. 109, ill*

“Varieties of the Jacques Cartier - Victoria Bridge tokens”. – Vol. 1, no. 4 (April 1971). p. 60–61, ill. – *varieties of Atwood #620-AC*

“Irregularities unlimited”.-- Vol. 1, no. 4 (April 1971). p. 63-64, ill. – *an illustrated discussion of a number of minting irregularities*

““Bubble ” coinage”. – Vol. 1, no. 8-9 (Aug. - Sep. 1971). p. 117, ill. – *discusses coinage varieties arising because of defective planchets containing air bubbles*

“Pattern -variety transportation tokens of the T.T.C.”.-- Vol. 1, no. 10 (Oct. 1971). p. 131, ill. – *the history resulting in the production of varieties in Toronto Transit Commission tokens.*

“The Mysterious 1950 30 cent piece”.-- Vol. 1, no. 10 (Oct. 1971). p. 134, ill. – *example of an error believed to be a multiple strike with both 5 cent and 25 cent dies on a 25 cent planchet is analyzed*

“Trial strikes re-examined”. – Vol. 1, no. 11 (Nov. 1971). p. 144-145. – *Weak and Strong variations of the trial strike process is identified, there is a follow up by the author in Vol. 1, no. 12 (Dec. 1971). p. 167, ill, also see follow up article by Haxby, Dr. James in Vol. 2, no. 1 (Jan. 1972). p. 2*

“Varieties of the DHO pattern token”. – Vol. 1, no. 11 (Nov. 1971). p. 149. – *a short history resulting in the production of varieties in Dept. of Highways of Ontario tokens*

“Accuracy assured”. – Vol. 1, no. 11 (Nov. 1971). p. 152-153. – *discusses various types of scientific equipment required to accurately authenticate certain coin irregularities using tests to determine specific gravity and mass, continued in Vol. 1, no. 12, p. 163*

“Early Canadian tokens”. – Vol. 1, no. 12 (Dec. 1971). p. 152-153. – *irregularities in early Canadian tokens with specific example of a Leroux token also identified as Breton #582. Also discussed is a brief history of Dr. Leroux*

“Ships, colonies and commerce tokens”. – Vol. 2, no. 2 (Feb. 1972). p. 28. – *varieties of the Ships, Colonies and Commerce tokens, listed by Breton as #997 and Charlton as #233; part II in Vol. 2, no. 3, p. 40; part III in Vol. 2, no. 4, p. 60*

““Trial strikes re-examined” re-examined again”. – Vol. 2, no. 2 (Feb. 1972). p. 33. – *follow up discussion to an article discussing weak and strong variations of the trial strike process in Vol. 1, no. 11 (Nov. 1971)*

“Accuracy assured: micrometers”. – Vol. 2, no. 2 (Feb. 1972). p. 36-37, ill. – *equipment required to accurately authenticate certain coin irregularities - specifically micrometers*

“Accuracy assured: balances and similar scales”. – Vol. 2, no. 3 (March 1972). p. 53. – *equipment required to accurately authenticate certain coin irregularities*

“Multum in parvo”. – Vol. 2, no. 4 (April 1972). p. 62-67, ill. – *types of unique multiple struck coins including multi-strikes and flip strikes are identified and examined*

REGITKO, JOHN ; BURNS, EDWARD

“Type 1 blank - genuine or fake?”. – Vol. 1, no. 1 (Jan. 1971). p. 8-9, ill. – *an in-depth study into the physical characteristics of Type 1 and 2 planchets with an intent to prove a Type 1 planchet is genuine*

ROSE, ROBERT

“Proof-like possibilities”. – Vol. 2, no. 2 (Feb. 1972). p. 29. – *a review of a number of 1965 proof-like sets reveals a mixture of different types of 1 cent, 10 cent and dollar coins*

TRIMBLE, RALPH

“Poor man's baseball cap”. – Vol. 1, no. 8 - 9 (Aug. - Sep. 1971). p. 107, ill. – *the mechanism in the production of brockages resembling a Baseball Cap is discussed*

“Dating a no-date dime”. – Vol. 1, no. 10 (Oct. 1971). p. 128-129. – *the mechanism in the production of a brockage is discussed as well as a method of dating such a coin, with its date obscured, from planchet and design characteristics*

“Elliptical Clip Brockages: A New Discovery”. – Vol. 1, no. 11 (Nov. 1971). p. 150-151, ill. – *examples of brockage caused by inclusion of a small elliptical clip when a planchet is struck are discussed*

“Broadstruck dimes : type I and type II planchets”. – Vol. 1, no. 12 (Dec. 1971). p. 162-163, ill. – *the existence and characteristics of 10 cent pieces minted on type I planchets is discussed*

“Brockages vs. die caps : part I true or false”. – Vol. 2, no. 1 (Jan. 1972). p. 9-11, ill. – *the production and characteristics of Brockages, part II in Vol. 2, no. 2, p. 26 - 27*

“Brockages vs. die caps : part II the culprit!”. – Vol. 2, no. 2 (Feb. 1972). p. 26-27, ill. – *continuation of an article concerning the production and characteristics of brockages published in Vol : 2, no. 1, p. 9-11*

ZOELL, HANS

“Wrong view on Canadian coins”. – Vol. 1, no. 1 (Jan. 1971). p. 5. – *review of an article published in Numismatic News (Dec. 1, 1970) titled "Pricing Canadian Coins"*

“Re-entry, re-cut, die-shift, deterioration”. – Vol. 1, no. 3 (March 1971). p. 42-43. – *article discussing the difference between these often-confused terms which are all associated with multiple die strikes resulting in distinctive doubling errors*

“Double-sided uniface coins”. – Vol. 1, no. 6-7 (June/July. 1971). p. 94. – *legitimate and counterfeit production of double sided uniface coins is examined*
